

## **REMARKS**

In the above-referenced Office Action, pending claims 1-4 and 6-8 stand rejected under 35 U.S.C. 102 and/or 103. Applicant respectfully traverses these rejections as set forth below and in the remarks submitted in previous responses, which are hereby incorporated by reference in their entirety.

Njemanze (U.S. 6,468,219) discloses moving files using the Internet. The office action characterizes the claimed subject matter as merely transferring data files over a network. However, claim 1 specifies much more. In addition to transferring data, the system provides access to retrieved data transferred to the remote location from a portal interface including a browser at a remote clinician station. As set forth in the previous response, Applicant maintains that the claimed subject matter “a portal interface including a browser at a remote clinician station providing access to the retrieved data over a network via the web server at the remote data location” as recited in claim 1 is not taught by the Njemanze reference. Nowhere does Njemanze describe or suggest providing a portal interface including a browser for providing access to retrieved data. For at least this reason, Applicant respectfully asserts the rejection is improper and should be withdrawn. Claim 1 distinguishes over Njemanze and is not anticipated. Claims 2-4 and 6-8 properly depend on claim 1, therefore claims 1-4 and 6-8 are allowable over Njemanze.

Applicant asserts that the remarks presented herein are fully responsive to the Office Action and are sufficient to overcome the rejections presented in the Office Action. However, there may be other arguments to be made as to why the pending claims are patentable. Applicant does not concede any such arguments by having not presented them herein. Withdrawal of the instant rejections and issuance of a Notice of Allowance is respectfully requested.

Should any issues remain outstanding, the Examiner is urged to telephone the undersigned to expedite prosecution. The Commissioner is authorized to charge any deficiencies and credit any overpayments to Deposit Account No. 13-2546.

Respectfully submitted,

Date: February 19, 2009
